EDUCATION

University of Washington

Seattle, WA

B.S. Computer Science | Minor: Business | Coursework: Data Structures & Parallelism, Hardware/Software Interface, Software Design, Discrete Math
June 2027-2028

Bellevue College

Associate of Arts & Sciences (Running Start) | GPA: 3.9
2023-2025

EXPERIENCE

DevSwarm — Campus Growth Lead

2025-Present

Identified and prospected campus CS clubs and student organizations, pitching DevSwarm's AI developer platform through cold outreach, event networking, and direct partnership conversations.
Executed multi-channel GTM campaigns across email, social, and in-person channels; tracked pipeline and conversion metrics to scale student sign-ups.
Converted initial outreach into sustained partnerships and recurring event collaborations.

Lovisa, Bellevue Square — Stylist

2025-Present

Deliver personalized styling consultations and product recommendations in a high-volume retail environment; consistently drive attachment sales and upsells through rapport-building and product expertise. Manage inventory replenishment, visual merchandising, and store operations to ensure product availability and maintain brand standards on the floor.

Amazon, Reachback Mentorship Program — Mentee

2025-Present

Selected for Amazon's competitive mentorship program; engaging 1:1 with senior Amazonians to develop technical depth in AI systems, cloud architecture, and software engineering best practices. Pursuing AWS AI Practitioner certification; applying cloud and ML frameworks directly to personal AI development projects alongside mentorship guidance.

Buildspace — C Seed Founder

2025-Present

Building an early-stage startup within Buildspace's selective C Seed cohort; developing product vision, validating market fit through user interviews, and iterating on go-to-market strategy.

UW Undergraduate Business Council — Committee Member, Bridging Borders & MOSAIC

2025-2026

Lead end-to-end planning and execution of cultural inclusion events for the UW campus community; manage outreach to student orgs, coordinate logistics, and drive attendance through targeted promotion.

Business Leadership Community — Project Manager

2022-2025

Directed professional development programming serving 1,500+ students annually; led a 30-member team with full budget ownership, stakeholder coordination, and performance tracking across concurrent events.
Designed outreach campaigns to grow event attendance year-over-year; managed vendor relationships and internal communications across departments.

Innovators Hub — Events Coordinator

2022-2025

Organized hackathons and tech events for 500+ attendees; owned sponsor and speaker outreach, promotional campaigns, and day-of logistics to ensure seamless execution.

DECA — VP of Promotion & Running Start Success

2021-2025

Recruited 190+ new members through targeted campaigns and direct outreach; managed social media content strategy and led chapter-wide promotional initiatives to grow chapter visibility.
Mentored 50+ Running Start peers on leadership and academics; qualified for DECA Internationals at both high school and collegiate levels.

PROJECTS

Sightline | Onshape API, Computer Vision, Speech-to-Text, Mesh-to-CAD

July 2026

1st place, Seattle AI and Data Hackathon

Built an AI assistant embedded directly in Onshape that reads a live CAD document, parts, features, assemblies, and mates, before answering, instead of relying on a user's written description. Combined camera and voice input across phone, iOS app, and Meta glasses with a mesh-to-CAD pipeline that converts an uploaded 3D scan into an editable parametric feature tree.

Built a human-in-the-loop trust and safety layer: every proposed change is shown before it is applied, capped in scope, checked against fresh model state, and logged with a signed, user-scoped audit trail. Co-led architecture and pitch strategy with one partner; shipped a working private beta with 304 automated tests passing.

Bin Sentinel | TensorFlow.js, Claude AI, ChromaDB, LangChain, Python

February 2026

1st place / 40+ teams, AISC Hackathon (Future Track) & Best Use of AI, Startupthon (Claude, Lavin at UW, ESEC)

Addressed the \$400B+ global waste mismanagement crisis. Built real-time recycling classifier using COCO-SSD + Claude AI multimodal analysis; RAG pipeline (ChromaDB + LangChain) embeds MRF guidelines from 4 US cities with city-agnostic architecture for nationwide municipal scaling.
Led team strategy, scoped the product roadmap, and communicated technical value proposition to non-technical judges and sponsors.

Outreach.AI | Firebase, Gemini API, Codex, React, RAG

April 2026

2nd place, Hack for Social Impact x WIT Regatta 2026

Built AI marketing platform enabling nonprofits to generate complete outreach kits (social posts, flyers, SMS, QR codes) from a single sentence, addressing the resource gap for teams of one managing operations, donor relations, and marketing at once.

Voice-trained on org materials for authentic tone; implemented Firebase backend with Gemini API for multi-format generation. Led product scoping and pitch strategy around real nonprofit pain points validated through user research.

acadAI | Python, React, FastAPI, LLM Integration

2024

3rd place, Leaner Startups AI Hackathon

Built AI platform generating personalized 4-year academic roadmaps targeting the 17M+ US college students underserved by academic advising.
Led cross-functional team from ideation to live investor pitch; roadmapping v2 with course scheduling, internship matching, and automated degree audit.

SKILLS

Business Development: Lead Generation, Pipeline Management, Cold Outreach, Relationship Building, GTM Strategy, CRM concepts

Communication: Public Speaking, Stakeholder Management, Cross-functional Collaboration, Event Promotion, Client Relations

Technical: Python, JavaScript, React, LLM Integration, Git, AWS
